

GKB Leaf-Clean

The Leaf-Clean is a ideal vacuum machine for vacuuming three leaves, small branches or cut grass on artificial grass fields, hybrid fields and nature fields. Because of the forward movement of the tractor, the leaves/ branches come under the shaft of the nozzle. The leaves are held under the shaft by the brush hole at the back and the partitions at the side.

The vacuum machine has a capacity of 1.050 liters. When the collection box is full, it can easily be emptied. By means of a lifting function the operator can easily throw the leaves into a container.

The brush sweeps the leaf/branches in one heap. When the pile is high enough, the rotating brush takes some of the swept heap and throws it into the air shaft. The air stream picks up the leaves, twigs or clippings and transports them to the container.

The vacuum machine has a capacity of 1,050 liters. When this container is full, it can easily be emptied. By means of a tilt function, the operator can easily throw the blade into a container.

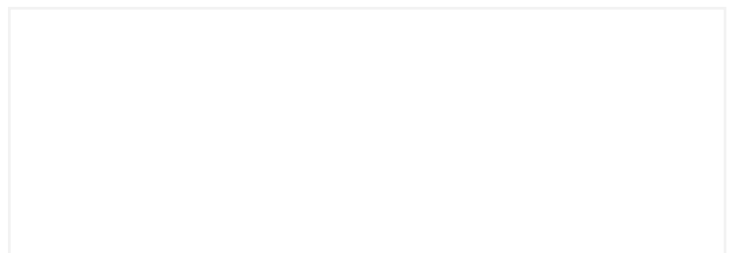

THE WORKER IS KING

Leaf-Clean

Specifications:

Type	LC150	LC180
Working width	150 cm / 59"	180 cm / 71"
Dimensions (l x w x h)	140 x 150 x 150 / 55 x 59 x 59 "	140 x 180 x 200 cm / 55 x 71 x 79"
Weight	400 kg / 882 lbs	600 kg / 1323 lbs
Power requirement	> 30 hp	> 45 hp
Linkage	Standard three-point hitch cat. I-II	Standard three-point hitch cat I - II
Capacity bunker	650 liters	1,050 liters
